Class Number 14774  
Plenary Section: Mo 9:00AM - 10:15AM  Micron Busin/Econ 1301  Scott Yenor, Stewart Gardner  
Discussion Section: TBA  
The Human Situation surveys ancient, modern, and contemporary debates on the question of how the individual relates to civil society. Most political and moral debates include a fundamental tension in this relationship. We see it clearly in times of national emergency or war when a country must restrict individual freedom to achieve the community's purposes. Yet it arises in everyday life in ways that we do not even notice, such as in controversies about the level of taxation or the variety of social and economic regulation, or with regard to debates about the relative importance of nature versus nurture-all of these are iterations of this fundamental tension. The controversy will never cease as long as human beings are both individuals and members of communities, gaining their identities both through free choice and from their cultural surroundings. NOTE: UF 100 is a required course for students entering Boise State University with fewer than 58 credit hours.
